

Matheus Alexandre Barbier de Alencar

Software Engineer

• matheus.alencar02199@gmail.com • linkedin.com/in/matheus-alexandre • github.com/MatheusABA • Portfolio

Education

Dom Bosco Catholic University

Bachelor's in Computer Engineering

Campo Grande, MS

Jan 2020 - Dec 2024

Experience

Talento Transfer LLC | Software Consulting

Remote

Software Engineer

Mar 2025 - Apr 2026

NODEJS • NESTJS • EXPRESSJS • JAVASCRIPT • TYPESCRIPT • PYTHON • REACTJS • NEXTJS • REACT NATIVE • EXPO • TAILWINDCSS • PRISMA • POSTGRESQL • MONGODB • FIREBASE • FIRESTORE • GCP • AWS • DIGITAL OCEAN • NGINX

- Delivered end-to-end development across web and mobile applications, covering backend, frontend, infrastructure, and deployment throughout the full product lifecycle.
- Built a React Native parking app enabling drivers to locate nearby lots, make reservations, and track history; developed a dual-role admin panel for lot owners and attendants to manage spots, employees, and real-time driver check-in/check-out flows.
- Developed a cross-platform iOS/Android React Native app featuring a global/regional ranking system, social feed, competition management with a points-and-rewards engine (redeemable for partner discounts and charitable donations), and an AI-powered chat assistant backed by domain-specific PDF training material with a per-user daily usage quota. Built companion Next.js admin panel for full content and competition management.
- Built a internal communications platform in React Native, delivering a company feed, multimedia library for manager-to-employee document and image distribution, and one-on-one/group chat via WebSockets.
- Developed a React Native app with group map-based discovery (Google Maps), event browsing, in-app product catalog with purchase flow, and a Next.js admin dashboard covering inventory management (XLSX import) and financial tracking (income/outcome records).
- Built a Next.js web platform for peer-to-peer ticket resale integrated with Mercado Pago Checkout, implementing a managed escrow-style transaction flow to enhance security for both buyers and sellers.
- Developed a two-app cooperative transit system (passenger + driver) in React Native for Android, with fixed admin-defined routes, real-time seat capacity management, and passenger pickup/dropoff reservation flows.
- Engineered idempotent payment processing integrations with Mercado Pago gateway, including webhook handling and asynchronous transaction flows to prevent duplicate charges.
- Implemented geolocation and mapping features using Google Maps and Mapbox, including proximity search, live route calculation, and location-based point-of-interest display.
- Built real-time features (one-on-one and group chat, live status updates) using WebSockets across multiple products.
- Designed and managed relational and non-relational databases (PostgreSQL, MongoDB, Firestore) using Prisma ORM, Mongoose, and Sequelize.
- Provisioned and hardened Linux servers on DigitalOcean for production Node.js applications, implementing secure SSH access policies, firewall restrictions, fail2ban protection, and TLS-secured Nginx reverse proxies. Managed application lifecycle and zero-downtime deployments with PM2.
- Leveraged cloud and serverless services including Firebase (Auth, Firestore), Google Cloud Functions, AWS S3, Lambda, and API Gateway for storage, on-demand processing, and authentication.

Funilize

Remote

Intern Back End Developer

Nov 2024 - Dec 2024

NODEJS • PYTHON • SCRAPY • LAMBDA • API GATEWAY • POSTGRESQL • COGNITO • CLOUD9 • STRIPE

- Developed features using AWS technologies such as API Gateway, Lambda, and Cognito for authentication and access control.
- Integrated Stripe webhooks for processing transactions and automatic balance updates.
- Automated the creation of Lambda functions for web scraping using Python and Scrapy.
- Modeled and managed PostgreSQL databases on Amazon RDS.

Brazilian Institute of Geography and Statistics (IBGE)

Campo Grande, MS

IT Support Intern

Sep 2023 - Nov 2024

- Managed IT asset inventory, set up devices for field surveys, and performed preventive/corrective hardware maintenance.
- Provided help desk support, ensuring operational continuity and resolving technical incidents.

Skills

Technical:

- **Back End:** NodeJS, NestJS, ExpressJS, Python, Java Spring Boot, Go, Gin
- **Front End:** React Native, ReactJS, NextJS, JavaScript, TypeScript, TailwindCSS
- **Databases:** PostgreSQL, MongoDB, Firestore
- **ORM:** Prisma, Mongoose, Hibernate
- **Cloud:** AWS (EC2, S3, Lambda, API Gateway, RDS, Cognito), GCP (Cloud Functions), Firebase (Authentication, Firestore), and Digital Ocean (Droplet, App Platform)
- **Infrastructure:** Linux, Nginx, PM2
- **Tools & Methodologies:** Git, Kanban

Languages:

- Portuguese Native
- Spanish C2
- English B1
